KURUME AZALEA, CORAL BELLS

TO OUR FRIENDS:

Favorable growing conditions, ideal climate and thorough care of our plants enable us to offer to the trade this year an excellent selection of stock.

To the florists we offer sheared, bushy, and heavily budded Kurume Azaleas which are just the thing for pot-plants—none of that leggy, leafless and budless stock often used in this type of trade.

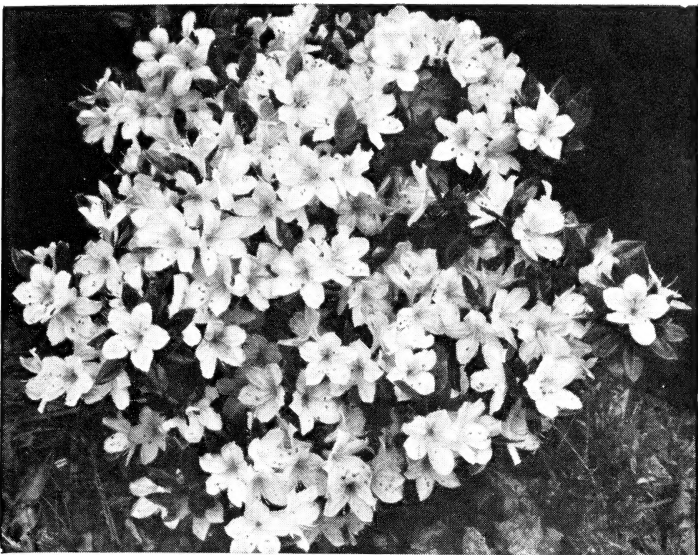

To the nurserymen and landscape designers we offer unequalled nursery stock of various sizes and grades. These plants are bound to please.

Try our stock! We know you will be completely satisfied. If you find time, visit with us, and if you can't possibly visit, try us with an order. You'll ask for more the next time.

With kindest regards to you, we remain,

Yours truly,

TOM DODD NURSERIES

AZALEA INDICA

Terms and Conditions

TERMS OF PAYMENT

CASH with order: 3% discount boxing-fee. Open accounts to those with approved credit only.

SPECIAL DISCOUNTS for truckloads and carloads.

C.O.D. ORDERS must be accompanied by 25% of purchase amount. For a deposit of 25% on any order, we will hold same.

PRICES

Lots of 5, 50, and 500 of same variety and same size will be sold at the 10, 100 and 1000 rates, with the exception of all varieties of Azaleas, on which we cannot accept orders for less than 25 liners of a single variety, nor less than 10 of any other size of a single variety. Specimen stock selected from or marked in the nursery by customers will be charged for according to its value. The prices will be a bit higher than the listed prices.

LIABILITY AND CLAIMS

We are not liable for injury to stock from frost, hail, fire, or other causes beyond our control, and we book orders with that understanding. While we use every means at our command to secure prompt delivery, we are NOT liable for delays in transit. Our responsibility ceases upon delivery in good order to the transportation agency. Correction for losses lies between the buyer and the agency, but we will gladly render what assistance we can. Claims must be made immediately upon the receipt of stock.

NON-WARRANTY CLAUSE

We give no warranty, expressed or implied, as to the description, quality, productiveness or any other matter of any nursery stock, seed, bulbs or plants we sell.

GRADES

We grade liberally. All stock of specified sizes are well developed and well rooted. No effort or expense is spared to assure you the best plants possible, and all plants must meet our required standard or they will not be shipped to anyone.

REFERENCES

As to our standing and responsibility, we refer to any bank or business house in Mobile, Ala., the leading nurserymen of the United States, and the Mobile Chamber of Commerce.

AZALEAS

Our efforts of the past season have been amply rewarded with the finest stock of Azaleas we have ever grown. As we said in our letter of introduction, we have developed some very fine plants in the Kurume type for the florist, but for the nurserymen and landscape men we have also the very best in Indica types as well as some very hardy Kurumes which, through special efforts, have been made to stand much colder weather than ordinary lath-house Azaleas. Local landscape men have found them a boon to their trade. As this list goes to press, our lining-out stock is in prime condition, and, from all indications, promises to be the "tops" in this section this year.

For culture, Azaleas need only slight attention and wonderful results may be obtained. They require a light, well-drained soil, slightly acid and containing peat-moss or leaf-mold if available. Partial shade, especially when young, and ample water during the dry weather are the other essentials.

Azaleas have proved their value in the South to the nurserymen and are rapidly proving their worth as pot-plants to the Northern florists. Use more Azaleas! You will find them a very profitable item in your trade.

Indica Azalea

The most popular of all Southern flowering shrubs and evergreens, the Indica Azalea continues to retain its unequaled charm and beauty in the landscaped gardens and lawns of the smallest to the largest estates.

As its popularity increases, our efforts to produce the best stock continues, and now we have a fine supply of many of this type. All are well rooted, have been root-pruned, and are guaranteed to have the best foliage color that can be produced. We urge you to try at least a few. You will be completely satisfied with the sales of these fine, beautiful plants.

BRILLIANT. Good, fast grower with medium large dark green foliage. Deep watermelon-color blooms. Good variety 6-8 in. to 18-24 in.

DAPHNE SALMON. With medium flowers, typical of the name in color, it is a very hardy plant that is ideal for greenhouse culture. 6-8 in. to 12-18 in.

DODD'S PINK. Very hardy Azalea with large pink flowers that bloom about the same time as Pride of Mobile. A good grower that blooms prolifically. 6-8 in. to 12-18 in.

FORMOSA (known also as General Lafayette). Probably the finest of its color—purplish pink. A strong, robust Azalea with large dark leaves and big flowers. Blooms early. A fast grower and very hardy. 6-8 in. to 2-3 ft.

GLORY OF SUNNINGHILL. Compact grower with shiny, narrow leaves. One of the latest bloomers with an orange-scarlet flower. 6-8 in. to 15-18 in.

PRIDE OF MOBILE (originally known as Watermelon-Pink). By far the best Indica Azalea. A fast grower with foliage a shade lighter than that of Formosa. Very hardy and a good bloomer, forming watermelon-pink blossoms in masses that completely cover the plant. 6-8 in. to 2-3 ft.

PRINCE OF ORANGE. A compact grower, slightly spreading, with large flowers of a deep orange-red color. They bloom a little after midseason. 6-8 in. to 12-18 in.

WHITE. Slightly upright and a fast grower with large pure white flowers. Very good for group plantings in informal gardens. 6-8 in. to 12-18 in.

Kurume Azaleas

Compact form, adapted for forcing, hardy and a veritable riot of color when in bloom, briefly describes the Kurume Azaleas.

Having gained rapid popularity, they are nearly the "tops" for all types of trade. They are used in border plantings in effective combinations with Indica Azaleas, with various landscape plans and now a profitable pot-plant for the florists and greenhouse men.

Some local nurserymen list the taller-growing Kurumes as "Hardy Japanese." Since most of them are only Kurumes, the only distinction we make is stating the habit of growth in separate varieties as we list them.

BENIGIRI. Bright deep pink, single, blooms. Midseason. An upright grower. Very pleasing. 4-6 in. to 15-18 in.

BESSIE A. DODD. This is becoming one of our best sellers. It is similar to Coral Bells, with a delicate, light pink flower, but blooms later and longer. A fast grower. 4-6 in. to 8-10 in.

BRIDESMAID. A very good grower with clusters of large salmon-pink blossoms. Low and compact. 4-6 in. to 10-12 in.

CHERRY BLOSSOM. Compact, slightly upright plants with large white flowers tinted with pink. 4-6 in. to 18-24 in.

CHRISTMAS CHEER. Small, deep crimson flowers on compact plant that is good for pot-culture. Very good Christmas plant as it profusely blooms at that season. 4-6 in. to 12-18 in.

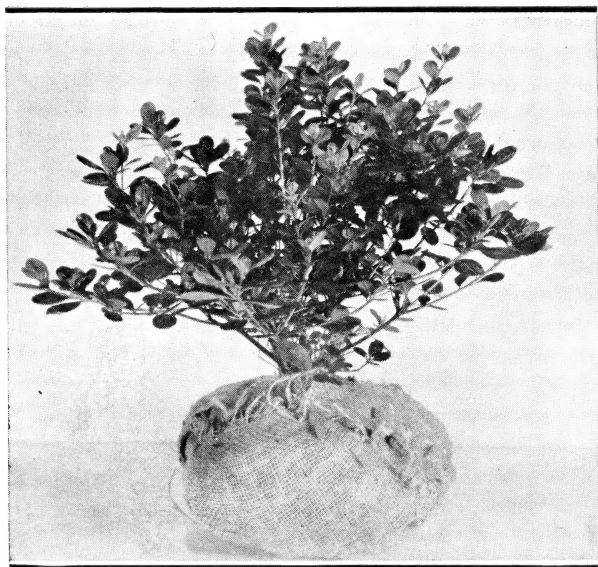

CORAL BELLS. Coral-pink, well-shaped, hose-in-hose flowers. One of the best plants for floriculture. Small leaves and a compact grower. Very beautiful. 4-6 in. to 6-8 in.

HEXE (Firefly). Slow, compact grower with showy deep scarlet hose-in-hose flowers. Small sizes to offer this year.

HINODEGIRI. One of the most popular of all Kurume Azaleas. Brilliant deep red flowers that are borne in clusters. Slow, compact grower, making it a good pot-plant. Continuously a favorite. 4-6 in. to 15-18 in.

PEACH BLOW. A fast-growing, slightly upright plant with single peach-color flowers in midseason. 4-6 in. to 18-24 in.

PINK PEARL. Another hose-in-hose type with large salmon-rose flowers that have a light center. Upright, yet compact grower. 4-8 in. to 18-24 in.

HINODEGIRI. 10-12 in. spread

KURUME AZALEAS, continued

SALMON BEAUTY. Large hose-in-hose salmon-pink flowers with light green foliage.

SALMON QUEEN. Large single flowers of salmon-pink are produced in great profusion in midseason. One of the most attractive.

SNOW. Pure snow-white hose-in-hose flowers that cover the plant. Dense, compact grower with dark green foliage. Best liked white Azalea. 4-6 in. to 18-24 in.

Important Notice!

Due to the shortage of burlap we have discontinued its use altogether on Azaleas regardless of the size and grades, and the prices quoted in this list on Azaleas are given as balled and NOT burlapped.

CAMELLIA JAPONICA

Presenting a grand array of color in the bleak and otherwise blossomless winter, *Camellia japonica*, "Aristocrat of the South," is gaining rapid favor in other sections of the country. Its beauty and importance has been definitely recognized on the West coast, and favorable comments from the Northern florists continue to increase.

Camellia culture presents no particular difficulties, but special care will be rewarded with beautiful, lasting blossoms. First, they must have a soil that is acid in reaction, and if this condition is not already present it may easily be obtained by addition of leaf-mold, peat-moss and applications of aluminum sulphate—one-quarter pound to a square yard.

Keep soil moist, yet not soggy. Camellias are shallow rooted and deep cultivation is not advisable. Full sun, only after plants are two or more years old, is advisable for best bloom-buds. Partial shade (no afternoon sun) gives more growth and a glossier green color.

Camellias may be fertilized with a mixture of cotton-seed meal, super-phosphate, potash, and well-rotted manure in the respective parts of 10-2-1-5. Aluminum sulphate should be added one-half part if soil needs acidifying.

The few diseases and insects attacking the Camellia may be controlled easily. Camellia or tea scale, the most common, may be eliminated by use of Florida Volck—1 part to 50 parts of water. Spraying should be done in the early morning or late afternoon, to prevent leaf-scalding. To protect the valued bloom-buds, do not spray in the winter.

Our Camellias have a beautiful color (many of them having been shaded) and are full of fine bloom-buds. Since there is a limited supply, you will do well to place your order early to get the varieties and number you want.

Class A Camellias

ALBA PLENO. Large, snow-white, double flowers early in the season. 3-5 in. to 18-24 in.

BROOKLYANA. Very double, pink flowers with white splotches. A bushy plant with large light green leaves. Small sizes only.

CHANDLERI ELEGANS. A very large, peony-shaped flower with red and white variegation, the stamens and petals being either closely or loosely formed. 3-5 in. to 2-3 ft.

PINK PERFECTION

CLASS A CAMELLIAS, continued

ENRICO BETTONI. Large pink blossoms varying in shape from double to peony-shape on same bush. Fast grower and heavily budded. Small sizes only.

HERME. One of the most popular Camellias. Pink and red variegation with a white margin in a large loosely peony-shaped flower. 3-5 in. to 2-3 ft. See illustration page 8.

MADAM "C". A seedling developed in our nurseries is one of the most beautiful semi-double Camellias. It has symmetrically shaped red wax-like petals with a soft velvety orange tint. Holds blossoms for an unusually long period and is a prolific bloomer. 3-5 in. to 2-3 ft.

MONARCH. Huge dark pink flowers of peony shape on a small compact plant that makes quite a picture when the plant is in full bloom. 3-5 in. to 2-3 ft.

OTOME. Similar to Pink Perfection but much larger flowers, with each end of petals fading to lighter shade of shell-pink. Small sizes only.

PINK PERFECTION. Early bloomer with flowers having symmetrically shaped petals of a soft shell-pink color. Plant blooms profusely. 3-5 in. to 2-3 ft. See illustration above.

PRINCE EUGENE NAPOLEON (Pope Pius IX). Good-sized, very double scarlet flower. Early to midseason. Compact grower. 3-5 in. to 18-24 in.

PROF. C. S. SARGENT. Very thick, peony-form, solid crimson blooms of medium size. 3-5 in. to 2-3 ft.

SEMI-DOUBLE BLUSH. Very light pink, almost white semi-double blooms with very bright yellow stamens. 3-5 in. to 2-3 ft.

SOPHIA. Spreading habit of growth. Medium-sized flowers variegated pink and white. Very similar to the Chandleri Elegans. Small sizes only.

Class B Camellias

AUSTILL PINK. Semi-double pink flower of medium size. The bush is a fast grower. 3-5 in. to 2-3 ft.

BEALI ROSEA. Flower similar to that of Pink Perfection but of a darker shade. Very double and medium size. 3-5 in. to 2-3 ft.

BROWN'S RED. A very dark red Camellia of semi-double type. 3-5 in. to 2-3 ft.

DUC DE ORLEANS. A pink-splashed, creamy white flower of peony shape with stamens intermixed with the center petals. 3-5 in. to 2-3 ft.

ELIZABETH. Snow-white flowers that are very double and with petals that are crinkled or frilled at the end. 3-5 in. to 2-3 ft.

GLOIRE DE NANTES. Large semi-double rose-red blooms. Very dark green foliage. Fast grower. 3-5 in. to 2-3 ft.

JARVIS RED. Another dark red, semi-double flower with bright yellow stamens. A favorite. All sizes. See illustration on page 9.

KELLINGTONIA. Large red flowers, white stripes. Blooms profusely and has large, heavy foliage.

MME. DE STREKALOFF. Peony form. Light pink petals with small stripes of crimson. All sizes.

MRS. ABBY WILDER. Medium-sized, double white flowers, often with splashes of pink. 3-5 in. to 2-3 ft.

RAINY SUN. Large, semi-double, rose-red blooms on an erect bush with narrow, twisted leaves.

REV. JOHN BENNETT. Fairly large orange-red flowers. Compact bush with dark green leaves.

ROSE EMRY. Crimson peony-form bloom of medium size, early in season. All sizes.

SINGLE RED NO. 1. Large single red blooms, but very pretty.

STANDARD. Compact, heavily budded plants with imbricated double deep pink blossoms, with white splotches.

HERME

JARVIS RED

CLASS B CAMELLIAS, continued

- TANNER-WILLIAMS RED.** Large semi-double red blossoms with dark green foliage on spreading bush. Heavy bloomer.
- THERESA MOSSINE.** Light pink, very double blooms with small petals.
- T. K. VARIEGATED.** Light and dark pink variegated, semi-double blooms with bright yellow stamens. All sizes.
- TRICOLOR.** Semi-double blooms ranging in color from white to red and variegated, on bushy plants with large dark green leaves.

MAGNOLIÆFLORA

KUMASAKA

Class C Camellias

LADY CAMPBELL. Compact, heavy grower, with double red flowers of medium size. 3-5 in. to 8-12 in.

LILY. White blooms of large, compact bush. 3-5 in. to 8-12 in.

MATHOTIANA ALBA. Very double, white, medium-sized blooms that open like rose-buds. Late. 3-5 in. to 18-24 in.

NAPOLEON D'ITALIE. Double red blooms with dark stripes. Compact bush; vigorous grower. 3-5 in. to 24-30 in.

SARAH FROST. Light red, double flowers with soft velvety petals. A fast grower with a compact shape.

SEMI-DOUBLE RED. Semi-double, medium-sized flower on a plant that blooms profusely. Very resistant to cold weather.

SEMI-DOUBLE PINK. Much like above, only pink in color.

RARE CAMELLIAS

ADOLPHE AUDUSSON. We consider this the finest of the semi-double reds. You only have to see this plant covered with its deep red blooms, which measure from 5 to 6 inches, to agree with us. The large heavy-textured petals have prominent stamens arranged irregularly among them. We recommend this Camellia to all our customers.

MAGNOLIÆFLORA. The lovely large petals of this Camellia are deep rose at the base and fade to a light blush near the tips. They have a firm, beautiful texture and do not shatter easily. The dark green foliage and the compact type of growth, furnish a nice contrast for this unusual flower. Illustration page 10.

GROUP II

COLONEL FIREY. Very large, unusually double bright red flowers with symmetrically arranged petals. A late bloomer. Illustration back cover.

DAIKAGURA. One of the very earliest Camellias, often coming into bloom in this section in September. Large, thick, peony-type, light red bloom with white blotches.

DEACON DODD. Large, peony-shaped blooms, opening like a rose-bud; soft red petals, flecked with white blotches. Dark green leaves on upright yet bushy plant. A very prolific bloomer.

DEBUTANTE. Velvet pink, peony-form blossoms. Bushy grower with light green leaves. See illustration front cover.

FANNY BOLIS. Large, single red flowers with white blotches. See illustration page 12.

KUMASAKA. Large, deep pink, peony-shaped blooms with white splotches. See illustration page 10.

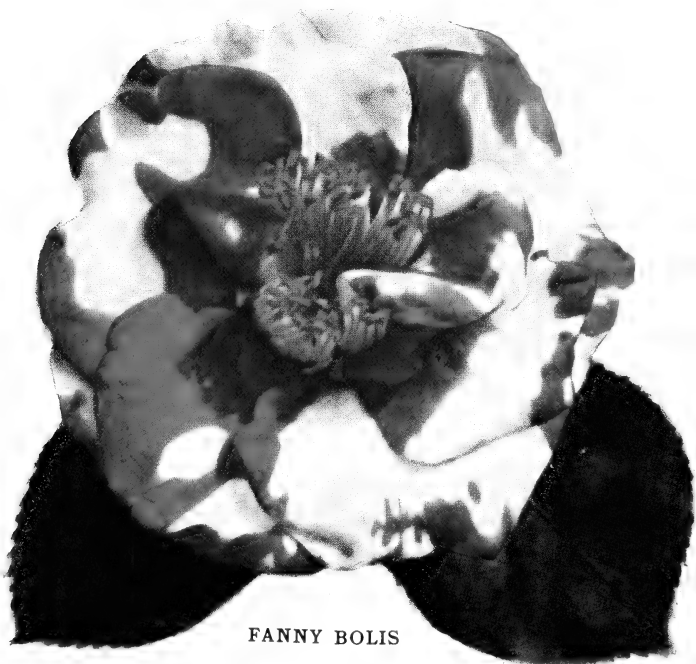

MARCHIONESS OF EXETER

RARE CAMELLIAS, GROUP II, continued

LADY CLARE. Huge, single pink blooms. One of the very largest Camellia blooms.

LAUREL LEAF. Large, double flowers with twisted, narrow, salmon-rose petals, blotched with white. Leaves similar to those of the laurel and of a very beautiful green color. One of the most beautiful Camellias in existence today.

MARCHIONESS OF EXETER. Very similar to Debutante, but a deeper pink color. An early bloomer. Illustration above.

FANNY BOLIS

RARE CAMELLIAS GROUP II, continued

NAGASAKI. Semi-double rose-pink flowers spotted with white. Round, dark green foliage. Slow in growth and a late bloomer.

PURITY. Large, full, double, star-shaped white flowers. Free flowering. A very good white.

PURPLE EMPEROR (Mathotiana Rubra; Purple Dawn). Large, symmetrically shaped flowers, red in center to purple on the outer edge. Illustration page 23.

SNOWDRIFT. A beautifully formed, semi-double pure white blossom. Long, dull green foliage and good grower.

VICTOR EMANUEL. One of the finest Camellias known. Plants of this Camellia with its beautiful, deep violet-red, large, peony-shaped blooms are one of the most sought for in the United States. A fast, bushy grower yet slightly upright. Illustration page 23.

PRICES OF ABOVE:	Each

LAWN GRASSES

ZOYZIA matrella (No. 13521). This fine grass, not be to confused with the *Zoyzia japonica*, is a dark green, fine-leaved type which produces a dense mat of growth that feels like a rug. First grass to come out in the spring and last to turn brown in the fall. Grows well in both sun and shade. Since no seed available, must be propagated vegetatively. Very probably the best lawn grass for the entire South.

PRICES ON ABOVE GRASS:

	Each	10
2-in. pots.....	\$0 06	\$4 00

CENTPEDE (*Eremochloa opbiuroides*). Another comparatively new grass with leaves not quite as fine as the *Zoyzia* and just a shade lighter. Grows well in sun and stands a moderate amount of shade. Will choke out the weeds and covers very quickly. Under conditions where care is not given, this is the best lawn grass available. Should not be fertilized very much.

ST. AUGUSTINE (*Stenotaphrum secundatum*). St. Augustine has gained its popularity in the South because of its ability to grow well in the shade and cover the ground rapidly. Has a large dark green leaf with a very glossy color. Does very well in the sun as well as shade.

BLUE-STEM ST. AUGUSTINE. This bitter-root type of St. Augustine, lately introduced in the South, is a lighter, bluer grass than the first type. Its growing habits and advantages are practically the same as the green type.

PRICES ON ABOVE 3 GRASSES:

	Each	10
Sq. yd.....	\$1 50	\$12 50

Miscellaneous Grasses

LIRIOPE Muscari densiflora (Big Blue Liriope). A low, grass-like evergreen with leaves 12 inches in length and large spikes of blue flowers in the summer. Very good for bordering, edging or rock-gardens.

	Each	10
Medium clumps.....	\$0 25	\$2 00

PAMPAS GRASS (*Cor'aderia argen'ea*).

Heavy clumps.....	80	7 00
Heavy divisions.....	40	3 00

LIRIOPE Muscari densiflora

ORIENTAL MAGNOLIAS

The most beautiful of all flowering trees. This group of Magnolias are known the world over for their beautiful blooms. They are quite hardy in most northern parts of the United States. Magnolias are becoming more popular year by year and each nurseryman should see that he has a few plants and that his customers have at least a few plants of each variety.

Note: Magnolias must be fertilized and worked regularly to assure proper blooms in the spring. Nurserymen should advise their customers.

MAGNOLIA liliflora (obovata). Large, tulip-shaped purplish flowers before the leaves appear. Many stems from the ground. A fast grower and free bloomer.

MAGNOLIA liliflora nigra (Purple Lily Magnolia). A vigorous grower, unusually attractive with its wine-colored flowers and distinct leaves. Blooms in early spring before leaves appear.

PRICES ON ABOVE TWO MAGNOLIAS:		Each
2 to 3 ft., B&B	\$1 25
3 to 4 ft., B&B	1 50
4 to 5 ft., B&B	1 75
5 to 6 ft., B&B	2 00
6 to 8 ft., B&B	3 00

MAGNOLIA Soulangeana (Saucer Magnolia). In mid-spring, before the leaves appear, the great furry flower-buds suddenly burst open, revealing enormous chalice-shaped flowers often 6 inches across. The waxy white petals, tinged with purple or rose, are unusually attractive. Leaves large, glossy green.

3 to 4 ft., B&B	\$1 75
4 to 5 ft., B&B	2 25
5 to 6 ft., B&B	2 50

MAGNOLIA stellata (Star Magnolia). Spreading habit of growth. Fragrant, semi-double white flowers appearing before leaves.
